- Akroni aluminum rims fitted
- SRM bottom end restoration including rods and uprated oil pump
- From a good home and well cared for
- Comes complete with various paperwork, handbooks, and spares list
- Current V5 and original RF60 logbook

The BSA Rocket Gold Star was a 646cc air-cooled parallel twin motorcycle produced by Birmingham Small Arms Company at Small Heath, Birmingham. Launched in February 1962, it was one of the final range of A10 twins, using a tuned A10 Super Rocket engine in the double-downtube Gold Star frame. Rocket Gold Star production ended in 1963 due to the development of new unit construction successors, designated as A65 in the 650cc capacity.

Lovingly restored over many years, this is an all correct matching numbers Rocket Gold Star machine that has been in its current ownership since 1984. With Akroni aluminum rims fitted the bike has had an SRM bottom end restoration, including rods and an uprated oil pump. The motorcycle has come from a good home and has been well cared for. Accompanying the motorcycle is various paperwork, handbooks and a spares list. There is a current V5C and an original RF60 logbook.
